Annex 1 to certificate no. 409/22

Definition of processing activities

Aspiegel SE offers a variety of mobile services to their customers. Petal Search is an app, which allows users to look up different kind of information in a variety of content types based on a given search query. The behaviour and use case of this app can be compared to other well known search engines available.

The scope of this evaluation is limited to the version of Petal Search as it is provided by Aspiegel to users in the European Union (EU)/European Economic Area (EEA). All functions, tools and services mentioned in "out of scope" are excluded. The following functions are subject to this evaluation:

1. Web Search

Provide users with web pages based on users intents.

2. App Search

Help users find and download apps quickly and conveniently.

3. Music Search

Provide users with music search related result, such as songs, singers, albums.

4. Video Search

Provide users with film and television videos search results.

5. News Search

Provide users with news services from mainstream media in the industry based on users intents

6. Images Search

Provide users with images based on users intents, users can also view the details of the image

7. Sports Search

Display sports scores according to the users intents

8. NewsBox

Provide users with news that will be displayed in the NewsBox on the homepage.

9. Ads Search

When users browse the search result page, some related advertisements are displayed and identified by 'AD' flag.

10. POI Search

Help users find POI (Point of Interest) which is always displayed on a map.

11. Browser Search

Provide users with search engine service in Huawei browser.

Annex 2 to certificate no. 409/22

Excluded processing activities

The following functions and/or services and/or product-versions are not subject to this evaluation and have not been reviewed by the experts:

1. Petal Search as it is provided to users outside the EU/EEA.
